Block Indent Free [Mac/Win] [March-2022]

Block Indent Crack [Win/Mac]

This plugin is a simple, quick and easy way to indent the current block by some space/tabs. It is bound to the navigation button of the Far toolbar, and will indent the selected block (or the current line) by the selected tab/space value. There are four presets for tab sizes (e.g. 8, 4, 2, 1), and two presets for space (e.g. 8 spaces, 4 spaces). Note: Space values are always used with the key up event, tabs are always used with the key down event. Installation How to: Extract the files of Block Indent Crack Keygen to the plugins folder of the Far install directory (either C:\Far\Plugins or C:\Program Files\Far\Plugins). Start Far. On the File menu, select: "Load and Install Plugins", and navigate to "Plugins" and choose the extracted file. Restart Far. Create/Open a document, select a block, hit tab or space key to indent. If you select another block, it will be indented. Using the Plugin: Using the plugin with the Far Button -Select "Block Indent" on the File menu and navigate to "Plugins". -Select the "BINDED" plugin. -Select the "Load and Install Plugins" in the menu bar. -Navigate to "Plugins" and select the Block Indent plugin. -Restart Far. -Select the Block Indent plugin on the "Load and Install Plugins" menu. -Select "Activate" to make the plugin available in the menu. Indenting the Current Line -Select "Block Indent" on the File menu and navigate to "Plugins". -Select the "BINDED" plugin. -Select the "Load and Install Plugins" in the menu bar. -Navigate to "Plugins" and select the Block Indent plugin. -Restart Far. -Select the "BINDED" plugin. -Select "Edit" in the menu bar. -Select "Preferences..." in the edit menu. -Select "Navigation" in the preferences window. -Navigate to "Navigation" and select the "Enable Tab Indent" checkbox. -Navigate to "Navigation"

Block Indent Crack +

* Indents selected block or line to nearest tab position * Indents in both directions (left & right) * Indents to the nearest space (instead of tab) * Creates a temporary file at the indentation location * Based on the indent in the textbox/buffer being indented * Also supports using macros * Works in any Far/Rime window * Uses built-in file manipulation functions AUTHOR * Sigguiri Ingemarsson, K:Sigguiri Ingemarsson, K: INSTALLATION Plugins are installed into your $HOME/.far

directory in $fplugin TO USE - Select a block or a line in the window and press the keys (arrows left/right) to toggle between tab and space. - Use the macro keys to define the Indent Macro. - You can create a macro for all indents by using the "Create Macro" button. If you want to add an extra space character at the beginning of the line, use the "NEXT LINE" button. If you want to get rid of an extra space character at the end of the line, use the "PREVIOUS LINE" button. The Far Automate plug-in can be used to automate Far macros, allowing you to create macros that work like macros, but make the last step be applying your text manipulation. Please note that automating macros requires Far Manager plugin Version 2.0 or later. Please see the documentation file for more information. VERSION Version 0.1 BUGS & FEEDBACK This program, like all things that people write, has a lot of bugs that can be reported. You are encouraged to report any bugs or feature requests to the author, including the suggestion of ideas for future versions. Version 0.1 has no known bugs. Visit the farmanager.sf.net site for the latest version. COPYRIGHT Copyright (C) 2003-2008, John Hodge. Block Indent Crack + With License Key Free Download X64 [2022-Latest]

--- Block Indent is a Far Manager plugin that indents the selected block (or the current line) to the nearest tab position or by space in the chosen direction (left or right). It can prove a useful plugin for making indenting in Far a lot easier. Its main advantages over the built-in Far indentation plugin are: 1. It provides selection mode: Indents the line selected with Shift (or with Ctrl), block selected with Alt, the entire Far document selected with Ctrl 2. It provides line mode: Indents the current line of the selected text/block 3. It is fully customizable: You can use any number of tab spaces for indenting, switch between Left and Right indent, set a fixed block indent, or toggle between automatic and manual indenting Its main disadvantages are: 1. The keyboard shortcuts conflict with Far's standard keyboard shortcuts (i.e. Shift+Left Arrow or Right Arrow to move to previous line or next line, respectively) 2. The menu (Sub-menus under Settings) may not always be visible (due to poor Far window management) 3. It does not indent automatically on new paragraphs 4. There is no keyboard shortcut for the block indenting functions 5. It does not provide a visual confirmation of the indentation 6. It is a beta release and thus still contains a number of bugs > ## Frequently Asked Questions > > 1. Why should I use Block Indent plugin instead of the built-in Far indentation plugin? > > Block Indent uses the same algorithm as the built-in Far indentation plugin. In addition, you can fully customize the indentation options (i.e. number of spaces to use for indenting, indent direction, whether to switch between automatic and manual indenting, etc.) with the Block Indent Settings window. > > 2. Will Block Indent disable the built-in Far indentation plugin? > > No, the built-in Far indentation plugin will remain available even after you activate Block Indent. > > 3. Will Block Indent conflict with Far's normal keyboard shortcuts? > > The keyboard shortcuts of the built-in Far indentation plugin conflict with those of Block Indent. To avoid this, you can always use the following keyboard shortcuts (instead of the default Far keyboard shortcuts): >
